Surface Cleaner Highlevel

The surface cleaner is made of V4A (AISI 316L), features an integrated calming zone, and can be equipped with either a mechanical or electronic water level controller. The suction opening has been enlarged to achieve improved backwashing performance. The electronic water sensor can be optimally positioned within the body using a quick adjustment mechanism.

Surface Cleaner Sievebasket

The surface cleaner is made of V4A (AISI 316L) and can be equipped with an electronic water level controller. The suction opening has been enlarged to improve backwashing performance. The cover can be bolted down to facilitate easier overbuilding. For design reasons, the E300-SB model does not include an upper opening. The appropriate strainer insert for each surface cleaner can be found on the following pages.

Floor drains

Floor drains are made of V4A (AISI 316L) and feature a 2" / 2 1/2" female connection. The drain opening has been enlarged to allow for improved emptying. The usable inner diameter is 130 mm for the EB-130 and 170 mm for the EB-170. Hair trap safety according to DIN EN 13451-3 is ensured when using at least two floor drains, either EB-130 or EB-170, with 2" connections and the corresponding covers, with a maximum flow of 4.5 m³/h for the EB-130 and 7.0 m³/h for the EB-170.
